Profile

I am a junior backend web developer proficient in HTML, CSS, and JavaScript, and actively expanding my skills in Node.js, PostgreSQL, and MongoDB. With a strong foundation in backend development, I am passionate about learning and growing within the industry. I possess effective communication skills and a problem-solving mindset, making me a valuable asset in collaborative team environments. My goal is to contribute positively to challenging projects and drive successful outcomes through innovative web solutions.

Skills			
• HTML5	• CSS3	• JavaScript	• BootStrap
• NodeJs	• PostgreSQL	• Git/Github	• json-server
• Express.js	• RESTful API	• MongoDB	

Professional Experience

Trainee at Coding Academy by Orange

September 2023 – December 2023

- intensive course in Back-end Web Development course in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).
- Proficient in version control and collaborative development using Git and GitHub, ensuring smooth teamwork and effective code management.
- Skilled in utilizing HTML, CSS, and JavaScript to craft user-friendly and visually appealing interfaces, enhancing overall user experience.
- Developed fast, scalable, and reliable backend servers for real-time data processing and communication using Node.js.
- Independently conceived, developed, and deployed 5 projects, showcasing a diverse range of technical skills and creative problem-solving abilities.

Projects

Glaze and Grace 🛮

Glaze and Grace is your top choice for luxury home decor. We offer fancy tableware, stylish glasses, sturdy pots, and lovely decorations. Our website is super easy to use and loads quickly. We use special tools like React.js, Node.js, Express.js, and PostgreSQL to make sure your shopping experience is great. Come and see our awesome products to make your home look elegant and stylish!

WanderWays 🛮

"Created a dynamic web application using Node.js, Express, and PostgreSQL, following the MVC design pattern. The application promotes Jordan's tourism, featuring a curated list of top destinations through an intuitive interface. Leveraged structured model, view, and controller components for seamless integration of server-side logic, database interactions, and user interface functionalities. Resulting in a smooth and immersive experience, users can explore Jordan's attractions effortlessly."

BookCraze 2

Developed user-friendly website for book enthusiasts, featuring welcoming homepage, service overview, and intuitive book search functionality. Implemented user registration and login, ensuring accurate data entry through robust form validation. Created detailed Book Catalog Page and User Profile Page for managing favorites and reading lists. Prioritized accessibility and integrated security measures using JSON server and Firebase.
